

SDI Review Form 1.6

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	2013_IRJPAC_6588
Title of the Manuscript:	Synthesis and Characterization of Bisdithiocarbamates from Weak Nitrogen Bases and its Metal Complexes
Type of the Article	Research Paper

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	1) In characterization for the novel prepared organic compounds (presented in sodium salts) and the other metal complexes, no NMR data were provided. These data for at least several key compounds and complexes are needed in this manuscript. 2) The X-ray analysis for these prepared metal complexes was absented. The crystal analysis for these complexes should be carried out and supplied in the manuscript.	In this manuscript I emphasis ligand IR and electronic spectral data provided. Now I incorporate ^{13}C NMR for ligands.
<u>Minor</u> REVISION comments	In Scheme 3.2. Tentative mechanism for bisdithiocarbamates formation from urea, the molecular skeltons are unclear, please provide ones with a higher resolution quanlity.	I redraw.
<u>Optional/General</u> comments
