Type of the Article	Short Research Articles

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Authors wrote the same sentences [As we said before, this is a short study and we will complete the study in the future. The cytotoxic properties of the complex in mammalian cells are under study.] for every comments of reviewer and did not changed the title of the manuscript. It is clear that this is an incomplete study and it is still under study. So title of the manuscript should be changed as written in my previous evaluation OR manuscript should be submitted after finished all the experiments using mammalian cells. Authors did not make intended changes in Material methods and discussion part.	The title of manuscript was changed to “ Mutagenic effects of some metal complexes I. Cytotoxic activity of Bis(L-glutaminato) Tetrachloropalladate(II)”
