

Author's feedback:

All requested corrections were made. The vegetation word has been corrected throughout the text. All corrections are blue highlighted.

In Material and Methods:

- a. The first paragraph and Figure 1 have been under the title "Studied area" in M & Ms. This paragraph should have been totally rephrased.
- b. The Methodology has been well described
- c. The 5 vegetation types just mentioned have been described shortly but clearly in the first paragraph of M& Ms
- d. Figure 2 have been omitted.

4. Results:

- a. "3-1- Actual statute of the vegetation": has been moved to the first paragraph of M& Ms.
- b. "3-2- Wealth and specific diversity of the sector of Agboville": have been rephrased to: "Plant species diversity of the sector of Agboville".

In the abstract the species number has been corrected.

- d. Table 1. Only three decimal numbers was retained
- e. The sentences of the recommended paragraph have been changed to

"Five (5) species with particular status have been registered. Among them, four (*Antrocaryon micraster*, *Cordia platythyrsa*, *Entandrophragma angolense* and *Milicia excelsa*) are vulnerable and one present risks of extinction according to IUCN (2013)." Table 2 should be deleted and species should be checked using IUCN Red List 2013 or 2014 and not 2009 (Be careful correct UICN to IUCN).

.

- f. In "3-4- Identification, analyzes and evaluation of the impacts of the project" The methodology of the described results is now in M& Ms.

- 5. The references have been enriched.
