SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	I have review the manuscript and convinced that the manuscript has the potential for publication in JAERI Journal, however, the author/s should make a serious major refinement especially on the discussion. The findings or results were however not explained in manner that one can understand the whole concept. It is very important for the author to explain all the possible mechanisms that might have impact on the results of the study. For example, one would want to know the reason why all the rates of application of atrazine did not have a negative impact on the growth of Yam. This information and others need to be clarified before the manuscript can be accepted for publication.	We agreed with Reviewer's comment and all necessary corrections, adjustment and additions have been made.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	I suggest that the manuscript be sent back to the author for correction and modification of the discussion and address all other queries that were raised.	We have done all the necessary corrections, modification and queries that were raised and has been answered.
