SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The article is a kind of status report in Gaza strip, Palestine. It describes all statistics of the municipal solid wastes and agricultural wastes. The open air composting is cited to be prepared just 2% of total solid waste produced and fore cast of set up is required for 18% of waste for composting by the year 2040. However, there is no any science in it hence it is getting difficult to justify its merit for consideration for production. The article is focussing problems and potential of solid waste management by composting. However, these technical aspects are not dealt with; hence nothing can be said about the ideal technology for speedy composting, compost quality, proper use and management of agriculture. The potential is good in all the said sphere and country should seek services of some expert consultant for ameliorating the situation and establish a pattern of management of solid waste.	
<u>Minor</u> REVISION comments	Authors should endeavour to bring science in the mss. Even the objective of writing the article is not stated.	
<u>Optional/General</u> comments	Topic is important and needs application of contemporary knowledge on the topic and their applications.
