SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript requires editing for syntax and grammar.	The manuscript was thoroughly examined for grammar and punctuation errors utilizing <i>WHITESMOKE 2012 Writing and Grammar Software</i> (http://www.whitesmoke.com/whitesmoke-writing-software.html). WhiteSmoke is the most comprehensive grammar checker in the world today. While it comprises several writing tools, such as a dictionary, a translator and a Writer's Toolkit, its core feature is its advanced grammar checker. All corrections, commas, and colons inserted are highlighted in yellow.
<u>Minor</u> REVISION comments	Discussion is more of a rehash of the results, and less critical evaluation of the literature.	I have added three new references in the text to further accentuate the importance of novel drug designs and their investigation for the beneficial treatment of skin neoplasms. These are references [30], [31], and [32].
<u>Optional/General</u> comments
