

SDI Review Form 1.6

Journal Name:	<u>Journal of Advances in Medical and Pharmaceutical Sciences</u>
Manuscript Number:	2014_JAMPS_11838
Title of the Manuscript:	Two Novel Alkylating Structural Analogues of Chloramphenicol Suitable for Topical Treatment of Dermal Neoplasms
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This is a well written manuscript. The science used in this research is very good, but as to whether these alkylating structural analogues will be effective in treatment of dermal neoplasms remains to be seen.	Thank you very much for this endorsement. I am grateful that these two analogues will be viewed by the scientific community. Skin cancer is a growing problem in the United States. Novel methodologies and novel drugs will be in continual demand in the future. This manuscript presents two novel drug designs and a novel means of approach in the development of new drugs to fight dermal neoplasms.
<u>Minor</u> REVISION comments	None	
<u>Optional/General</u> comments	I recommend it	Thank you.
