

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	2014_JAMPS_12865
Title of the Manuscript:	Is Cystoid Macular Edema More Frequent In Vitrectomized Internal Limiting Membrane-peeled Eyes Undergoing Phacoemulsification?
Type of the Article	Short communication

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Introduction. - Page 2. L36-37. Citations of references from the same source should be given at the end of the phrase (i.e. citation for reference [1] should be given only at the end of the phrase). - Page 2. L47. "in patients with no ocular comorbidities, the type of CME is not specified" should be replaced by "in patients with no ocular comorbidities, although the type of CME is not specified." Materials and Methods - Page 3. L69. The comma should be removed after "OCT filed on". Results - Page 3. L83-84. Demographic data of patients could be joined in one phrase like this "The mean age of the 43 patients in this study was 68.1 ± 12.7 years, in which 67% of them were female." - Page 4. L100-101. The group to which patients belong could be added "Two of these patients had PPV ILM-peel followed by PE (Group 4), the remaining patient had PE followed by PPV ILM-peel (Group 3)". Discussion - Page 4. First para. L108-110. Unintelligible, you compare the rates of symptomatic CME in your study with other publicated studies and then mixed them with rates of OCT-evident CME in the "population". What population? - Page 4. L111. "The incidence of CME was highest group 4 relative to all the other groups, recurrent CME was also highest in this group" should be corrected like this "The incidence of CME was highest in group 4 relative to all the other groups, recurrent CME was also higher in this group." - Page 4. L112. "While our results did not reach statistical significance this trend warrants reporting" should be corrected with "While our results did not reach statistical significance so that this trend warrants	Thank you to the Final Evaluator for the kind advice. L36-37 Changed as advised Page 2. L48 changed as advised Page 3. L70 Changed as advised Page 3. L86-87 Changed as advised Page 4. L107-109 Changed as advised Page 4.L118-120 We meant population in the statistical sense to mean all individuals. We have changed the text to clarify. Which suggests the rate of OCT-evident CME in our sample may approximate that in the wider population. Page 4. L120 Changed as advised Page 4. L121 Changed as advised

SDI FINAL EVALUATION FORM 1.1

reporting”. • Page 4. L115. “under went” should be replaced by “underwent”. • • Page 5. L144. “This is the first study to use a compare the rate of CME in both sequences...” shloud be replaced by “This is the first study that compares the rate of CME in both sequences...” • Page 5. L146. “to report” should be replaced by “that report” Figures and Tables • Page 9. L203. CMT is measured in millimeters (mm) or microns (μm)? • References for Table 1, Figure 1, Figure 2 and Figure 3 should be given as footnote.	Changed as advised Page 5. L153 Changed as advised Page 5. L155 Changed as advised Page 9. L220 Changed as advised (CMT in μm) References for Table 1, Figure 1, Figure 2 and Figure 3 Changed as advised
