SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The paper is interesting. Authors proposed simple, quickly and not invasive method for investigations of results of chemotherapy. Conditions of the experiment is described clearly and exactly, it permit use the method in some laboratories on the basis of the article. The validation process is carried out correctly. The validation parameters obtained by authors are correct. In analytical point of view the experiment is correct. In my opinion the paper may be published with a very little corrections	
<u>Minor</u> REVISION comments	1. Chromatogram of the healthy subject is unnecessary - enough comment that in healthy patient no peaks in the chromatograms were observed. 2. p. 3 (paragraph 2.3) - the injection volume is 10 mL or 10 microliters?	
<u>Optional/General</u> comments	Ethical issues -:yes competing interest-: yes
