SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	NSAIDs groups drugs especially, Diclofenac, Ibuprofen, Nimesulide, is known side effects or treatment function. This manuscript doesn't have any new information. But comparative study result is so interesting for tolerability. It can be useful this manuscript for drug molecular polarity and new chain or design NSAIDs groups drugs. Animal research ethical number and approved should be add in manuscript experimental procedures.	The manuscript presented reviewed information from previous research findings regarding NSAID group and the new finding based on the comparative study on NSAIDs especially for tolerability. Done
