Editor's Comment:

I read the original manuscript and the reviewers comments and the revised manuscript. The manuscript contain important information and should be published provided that the authors address the following comment in a revised text.

1. All Tables and Figures should stand out alone without going back and forth to the text.

2. Did the authors have any data on individual treatment of the extracts when compared with the combined treatment?

3. The authors stated that there were dose-response curves for the oil extracts, however, there were no data provided. Kindly provide such data.

4. What would be the advantage of the experimental treatment vs. Vitamin C and Vitamin E?

5. Please run a spell check on the revised manuscript.

I would like to read and approve the revised manuscript.
