

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	2015_JAMPS_16310
Title of the Manuscript:	Positive Anti-Cadmium Poisoning Anti-Oxidant Effects of Moringa Seed Oil and Cashew Nut Oil in Juvenile Wistar Rats Hippocampus
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
As I commented last time that the authors should perform the determination of anti-oxidant capacity and/or phenolic compound of substance. It's very important. Otherwise the authors cannot interpreted the result of these effects were ameliorated by the anti-oxidant contents of the oil substances.	Authors appreciate reviewer's opinion: Literatures have convincingly demonstrated the presence of antioxidant agents in the natural substances [just see the internet for several of them]. Researchers don't always go back to validate established scientific facts. Yet, we have results of the phytochemical analysis of the plants used and this information corresponds with the ones being published by researchers before. This could not have been included in this current article because it is not within the scope by design.
