Editorial Comments:

1. All Tables and Figures should stand out alone without going back and forth to the text. [Tables and their info are now on new pages]

2. Did the authors have any data on individual treatment of the extracts when compared with the combined treatment? [There are- that's what the data from E and F show; G is the combined]

3. The authors stated that there were dose-response curves for the oil extracts, however, there were no data provided. Kindly provide such data. [This was not mentioned relative to the current investigation or its results]

4. What would be the advantage of the experimental treatment vs. Vitamin C and Vitamin E? [Oils have more than one/each of the antioxidants in them]

5. Please run a spell check on the revised manuscript.

Author's Feedback:

1.**Editor:** All Tables and Figures should stand out alone without going back and forth to the text.
Author: Tables and their info are now on new pages

2. **Editor:** Did the authors have any data on individual treatment of the extracts when compared with the combined treatment?
Author: There are- that's what the data from E and F show; G is the combined

3. **Editor:** The authors stated that there were dose-response curves for the oil extracts, however, there were no data provided. Kindly provide such data.
Author: This was not mentioned relative to the current investigation or its results]

4. **Editor:** What would be the advantage of the experimental treatment vs. Vitamin C and Vitamin E?
Author: Oils have more than one of each of the antioxidants in them [combined]

5. **Editor:** Please run a spell check on the revised manuscript.
Author: Done. Thanks
