SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	This study is related to Comparison of serum magnesium levels in Pre-eclamptic and Normotensive pregnant Nigerian women. This is an important subject in Obstetrics. The contributors have a good study design. They have enough study population because previous studies in Nigerian, as O Akinloye et al. designed a study with a 49 preeclampsia and 40 control group. Furthermore I P Odigie et al. had 36 preeclampsia and 32 control group in their study. The results are well discussed and the message is clearly given. The writing is concise and clear throughout the manuscript.
