SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1- Line 39, why you include only nonobese persons please clarify? 2- Line 34, introduction is very short and may need more explanation of some points as a. the metabolic role of androgen b. relation between androgen and insulin resistance 3- Line 41, how can you exclude insulin resistance from history? 4- What are you mean any disorder affecting hair density? 5- Please mention abbreviation HOMA-IR only as you mentioned whole word in	

SDI Review Form 1.6

	abstract 6- Reference of hair scoring system 7- Line 19, you mentioned "Total trunk hair was positively correlated with HOMA-IR ($P = 0.019$) and insulin resistance ($P = 0.003$)", so what is the difference between HOMA-IR and insulin resistance I think one P for trunk hair and other for abdominal hair, please revise. 8- Is there any correlation with hair density, insulin resistance and family history of diabetes? 9- No any comment on lipid level? 10- No any tables include the results of the paper, I do not know is this only in my copy.	
--	---	--

SDI Review Form 1.6

<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	11- I think if androgen level was tested, it will add to the work.
