SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	See below	
<u>Minor</u> REVISION comments	This is a straight forward case report of a rare condition and is worthy of publication. However, the submission is sloppy with multiple spelling errors. For example, In the title “Multiple” is spelled “mulitpl”, “Thyroid” is misspelled “tyriod” on several occasion, and “orthoptic” is misspelled ortoptic on several occasions, to name but a few. Surely a simple spell check could have been done to eradicate these errors. Similarly, the grammar is often incomplete with simple such a “a” or “the” being left out. The paragraph lines 89 – 93 in the discussion, relating to animal models, is difficult to interpret and not relevant to this case, and should be left out with ref 12 removed.	
<u>Optional/General</u> comments	With removal of the above paragraph, and correction of spelling and grammar.
