|                          |                                                                                                                                           |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">Journal of Advances in Medical and Pharmaceutical Sciences</a>                                                                |
| Manuscript Number:       | 2015_JAMPS_16185                                                                                                                          |
| Title of the Manuscript: | Detection of and adjustment for multiple unmeasured confounding variables in logistic regression by Bayesian structural equation modeling |
| Type of the Article      | Method Article                                                                                                                            |

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

**PART 1: Review Comments**

|                                            | <b>Reviewer's comment</b>                                                                                                                                                               | <b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments | 1) Line 23: Matching in case control studies does not aim to control for confounding by matching factors, in fact it may actually introduce confounding in some cases. Please rephrase. |                                                                                                                                                                                      |
| <b><u>Minor</u></b> REVISION comments      | 1) Delete "In conclusion," from the Conclusion section as it is redundant.<br>2) "outcomes" misspelled line 180                                                                         |                                                                                                                                                                                      |
| <b><u>Optional/General</u></b> comments    | The paper is considered timely and the manuscript well-written and easy to follow.                                                                                                      |                                                                                                                                                                                      |
