

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	2015_JAMPS_16083
Title of the Manuscript:	Prevalence of Self-Medication Practice among Secondary School Students in Ekiti-State, Southwest Nigeria
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Abstract: Lines 26-27: "The practice of self-medication was found to be prevalent among secondary school students <u>with</u>." Either the sentence is incomplete, or just erase "with". Results: Table 4: would you please use the same font (Calibri because figures have a Times New Roman font). Discussion: Lines 246-253: "The significant difference between age groups of respondents in the practice of self- medication disagreed with the assertions in previous studies. For instance, no significant difference was observed between different age groups and self-medication [29] (ok) and significant relationship were found to exist between age and the practice of self-medication- [16,18] (so the results of these previous studies do not disagree with the results of the present study). The variations in this study and others could be as a result of the age of the respondents in this study because many of the respondents at the time of this study were experiencing major physiological, emotional and psychological changes." In total, the study can now be published, providing all the informations another researcher would need to understand and/or reproduce to conduct a similar study. I hope the corrections we made together will help readers to understand such an interesting article with more fluidity, respecting all scientific standards. My last comments rather correct typing errors and matters. Congratulations for your work.
