PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I have reviewed again the manuscript "Safety Evaluation of Giant African land Snails (<i>Achachatina marginata</i>) Haemolymph on Hematological and Biochemical Parameters of Albino Rats" 2. The authors have attended the most of the recommendations suggested. However, some old reference material remains in the "references" section. 3. In addition, I think format of the tables are not appropriate to be published in the current form. 4. I think the editorial committee will take the right decision about it.
