SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	1. The title and the text includes the word "localization". The word "location" would be more suitable. Tumour localisation implies an active process such a surgery or radiation and the meaning here is the location or anatomic site of the tumour. 2. Methodology Line 55: the word evolution should be changed to outcome 3. Conclusion line 161: Suggest changing the last sentence to "Children and the elderly have the highest mortality from cancer."	1. OK thank you for the remark, we changed it all over the text. 2. OK, done. 3. We meant by this sentence to show that there is an association between the age and the length of survival, we indeed changed the expression but we kept the word "survival". Thank you.
<u>Optional/General</u> comments	Good descriptive study of incidence, site, and age related mortality in the study population.	Thank you
