SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Change "Small cell cancer of the Lung" to "small cell lung carcinoma" Literature is not uniformly written, must be corrected according to Vancouver declaration or authors' instruction of the journal. Correct some errors as "61year" to "61-year"	WE agree and we have made the requested changes. We have also corrected the references.
<u>Minor</u> REVISION comments	I strongly suggest to try to apply ACTH immunohistochemical staining on tumor tissue and to detect and confirm its secretion in malignant cells. If you show to us positive ACTH reaction, this paper will be much more interesting.	WE did contact the pathology department and they have expressed inability to do the ACTH staining on the slides. We apologize for not being able to get it done but hope and believe you will find the article interesting enough to be published.
<u>Optional/General</u> comments	Interesting manuscript, specially in everyday, routine practise.
