SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	An excellent multicentre trial involving internet data With PubMed,Google,Google Scholar and Educus	
<u>Minor</u> REVISION comments	The value of thid paper is the study of a real rare tumor of the kidney	
<u>Optional/General</u> comments	MRI and CT are useful methods without differences	I have been silent on MRI and CT because of problems of extra-radiation in CT and cost of MRI and ultrasound scan instead as initial screening and if a lesion is found then CT/MRI would be indicated. I have been advised that repeated MRI would be too expensive especially when the pick up rate is low / globally it would appear to be too expensive to use CT /MRI on long term basis
