

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Ophthalmology Research: An international Journal
Manuscript Number:	2013_OR_4790
Title of the Manuscript:	Prospective pilot study looking at the size and variation of the blind spot scotoma in adults measured on the Octopus 900 field analyser

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Results 1. To standardized the decimal point for the value of LogMAR visual acuity and weight 2. Abbreviation for right eye (RE) and left eye (LE) were introduced in line 113 but the words right eye and left eye were introduced earlier in line 67, 99 and 101 3. To clarify the term target size (in Table 2, title Figure 1, title Figure 2, line 185, axis x Figure 2) whether should be written as target stimulus as mentioned in methods (line 68) 4. Should write blind spot scotoma area, mean$\pm$SD in the second and third column below the word 1st trial and 2nd trial in Table 2 5. To standardized the way to write the term 1st trial and 2nd trial or first trial and second trial (line 142, 144, 164, 241 and 246) 6. It was mentioned that there was significant difference occurred (line 172) but the P value was not stated (line 173) 7. Figure 3 showed that target stimulus I2e is for mid peripheral field and target stimulus I4e is for outer peripheral field, so it (mid / outer) should also mentioned in line 192, 193 and also in methods (line 65)
