SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	This case is very rare, important, and interesting. However, more information is needed to clearly understand the treatment progress.	Thank you for the comments.
<u>Minor</u> REVISION comments	1) The fluctuation of the intraocular pressure should be described. 2) On line 81, the name of the steroids which were used for both topical and general treatments should be added. Moreover, the quantities and the length of time they were used should also be described.	Thank you for the comments. The names of the topical and general treatment have been added into the case report.
<u>Optional/General</u> comments	3) In the abstract, I think that the term "cervical neck" should really be "cervical lymph node". Is that correct?	Thank you. The amendment has been made to "cervical lymph node" in the abstract.
