Subject: Re: Request for editorial decision for manuscript number 2014_OR_12466

Manuscript Title: **A comparative study of Pterygium excision using autologous blood versus sutures; A study from remote eastern Bihar, India describes a genuine comparison between two surgical techniques and the findings are:** 100% surgical success was seen in conjunctival graft with sutures whereas only 68% **surgical success was seen those patients with autologous blood.** This down to earth paper reflects the real challenges in rural countries and deserves publication.

Decision: Accept

Editor's Details:

Prof. Ahmad M Mansour
