SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The main purpose of the manuscript is to report the non-surgical management of ectropion in a Collodion baby. Although the authors describe the topical management with cloranfenicol ointment and hypertonic saline solution, I would like to know if the other treatment with olive oil (line 59-61) was also applied to the eyelids. If so, it would be advisable that the authors described how the olive oil (Goya extra virgin) was applied because this is not a topical treatment frequently used in ophthalmology.	
<u>Minor</u> REVISION comments	NONE	
<u>Optional/General</u> comments	Interesting case with a rapid and successful response.
