**SDI Review Form 1.6**

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> ( <i>if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here</i> )
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	<p>The etiology of the clinical symptoms described by authors remains very speculative. No bacterial, virological or histological have been performed in this case allowing any physiopathological discussion. The proposition of "a multi-center randomized interventional trial that involves heterogeneous groups of HIV patients" and the recommendation of a study "to find the association between topical steroids and CD4 cells on corneal health» seem entirely unrealistic</p>	

**Reviewer Details:**

Name:	<b>Philippe Genet</b>
Department, University & Country	<b>Department of Hematology, Unit of Immunology, Centre Hospitalier Victor Dupouy, Argenteuil, France</b>
