SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	Unfortunately, this reviewer thinks that there is no enough constructive material to warrant publication in this manuscript. The author's case is serious, unhappy and regrettable case but not rare and interesting case. And all mentioned ophthalmologists did their own work, and managed the patient's complication properly. There is some risk involved in every ocular surgery. Of course, as the author's suggestion, the consultation and discussion should be accompanied in the diagnosis and treatment of patients. In the large eye hospital, many ophthalmologists have their own sub-speciality, so they can give a detail medical service to their patients. All-round one ophthalmologist cannot do every ophthalmological procedure. They do their best, but some pitiful case can exist. The authors suggested a valid criticism but this kind of issue don't make the article or paper. This manuscript could not give the interesting scientific issue, and also did not be written on the basis of proper medical knowledge.
