SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The paper discusses a case of with the diagnosis of AMPEE that progressed to stroke with fatal outcome. The pers presents a satisfactory literature review on the subject. My question, is there any relation between the described entity which appears to be a vasculitis-related problem and temporal arteritis? They may be related because of eye involvement and different by patient's age and severity.	Thank you for the prompt evaluation of our manuscript. We did not put any additional information about the probability of temporal arteritis as we could not reach a conclusive evidence about the existence of any vasculitis without the autopsy. It was clearly indicated in the text that autopsy could not be performed
<u>Minor</u> REVISION comments	Typos: lesions instead of lessions infarction insead of infaction So far instead of Thus far cerebral instead of serebral Please let a native English speaker read the manuscript for smooth language flow and conjunctions. What is ??????? Remove it or replace it!	We corrected all of the misspellings as pointed by the reviewers.
<u>Optional/General</u> comments
