SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Dear Editor I reviewed the manuscript entitled "Ocular manifestations in Rheumatoid 1 Arthritis" The authors reported the frequency of ocular manifestations of RA. There are some serous issues should be evaluated properly. First the discussion is poor and should be extended with relevant literature. Second the material method and the results should corresponde each other. The statistical analyses should be given properly. The definitions should be given clearly in the M& M section. Third the introduction part should give brief summary of the current literature. The last, references should be arranged according to the informations for authors. They should be in a standard fashion. I suggest some literature that authors should discuss in the DISCUSSION	We thank the reviewer for the comment We have revised We have revised We have revised We have revised
