SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	As age related macular degeneration (AMD) is the leading cause of visual impairment and blindness in western countries I consider this study to have valuable data that would be of interest. Because modern medicine does not have any good medication for dry AMD every effort to change it is worth doing. The advantage of this paper is also the research of the potential influence of this novel therapy to maintain cognitive functions. On the other hand small number of participant is a big disadvantage.	
<u>Minor</u> REVISION comments	the lack of placebo group	
<u>Optional/General</u> comments
