

**SDI Review Form 1.6**

**PART 1:**

Journal Name:	<a href="#">Physical Review &amp; Research International</a>
Manuscript Number:	<b>MS: 2012/PRRI/2399</b>
Title of the Manuscript:	<b>The classical mechanics from the quantum equation.</b>

**General guideline for Peer Review process is available in this link:**

**(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)**

- This form has total 9 parts. Kindly note that you should use all the parts of this review form.

## SDI Review Form 1.6

### **PART 2:** Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b><u>Compulsory</u></b> REVISION comments	<b>This work belongs to the line of research that tries to associate the appropriate equations to the evolution of the probability density of quantum systems. The work is very formal and perhaps it would be necessary to provide some more explanation than is provided. Also recommend the author to read and cite the work of Laura Morato about a more complex version of the ordinary Madelung fluid and those of Michele Pavon that associate a Hamiltonian formalism to stochastic mechanics that could be useful in the context of this model.</b>	Additional explanations about symbols and mathematical statements have been introduced into the text. The recommended works of the referee have been analysed and found appropriate to complete the introductory section.
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
