

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Physical Review & Research International
Manuscript Number:	MS: 2012_PRR1 2898
Title of the Manuscript:	Quantum Effects on Rayleigh-Taylor instability of a plasma-vacuum.

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>I expected to author to write the response in more specific way. The improvement of the manuscript is very good. But still some comments are not response well. The authors simply mention that the comments have been considered/ done, but they do not respond properly. Before I recommend the paper to publish in Physical Review & Research International (PRRI), author should response the followings (especially 1st comment) –</p> <p>1. Author should explain in details-</p> <p> c. How the present results are significantly different from previous work?</p> <p>4. Some notification used without its definition, like σ and k. Author should explain ‘ρ is the density, p thermal pressure, g is the gravitational acceleration’ of what?</p> <p>In addition with-</p> <p>1. Author may not define q_l again after Eq. (47) as it has already done in Eq. (43).</p> <p>2. Definition of m_e and m_i in Eq. (14) also missing.</p>
