- This form has total 9 parts. Kindly note that you should use all the parts of this review form.

## SDI Review Form 1.6

### **PART 2:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	The scope of the manuscript might be of interest and as far as I know, studies of compactons and solitons using FEM are rare. However, the paper does not include any details whatsoever concerning the FEM solution procedure and therefore it is impossible to judge the quality of the paper and the included results. My suggestion is therefore that the authors rewrite the paper in a much more detailed manner including an introduction with a good background to the necessity of the paper. Then, but only then, it would be possible to make a proper review of the paper.	
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
