SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	The Paper is well-motivated, well-written and contains interesting results. All calculations are correct and the presentation is also suitable. I recommend publication of this paper. The only thing that is necessary to be considered before publication is a reference to the Planck scale physics. This can be done by referring to [arXiv:hep-th/0508078] and [arXiv:1205.0158].	Thank you for your comment and for taking the time to verify our calculations. We have added an additional reference to our paper in the area of Planck scale physics as requested. The reference is in lines 610 to 612. We appreciate pointing out these valuable references and plan to explore them further as we continue to develop our model.
<u>Optional/General</u> comments
