

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Physical Review & Research International
Manuscript Number:	MS: 2013_PRR1_3363
Title of the Manuscript:	Quantum Gravity and the Holographic Mass

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Although there are still some unclear things in the present work which might need further exploration, the results about nuclear force are enough interesting and also possibly helpful for the present research of quantum gravity or Grand Unity theory. So the paper deserves publication.</p>	<p>Thank you for this final evaluation and for your consideration of our manuscript. We intend to continue to explore our generalized holographic approach and to extend our understanding of the mechanics at work to further develop and clarify our results. We appreciate the reviewer's comment and approval for publication.</p> <p>P.S. The only changes we have made to the manuscript are small formatting edits to equation (24) line 256, equation (25) line 293, and equation (26) line 304, where we moved the factor of 2 from the numerator to the middle outside of the division, in order to remain consistent with the algebra format of the equations in the remainder of the manuscript.</p>
