

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Physical Review & Research International
Manuscript Number:	2013_PRR1_4043
Title of the Manuscript:	A Fast and Simple Algorithm for Detecting Large Scale Structures

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I have reviewed the revised version of Baiesi Pillastrini paper “A Fast and Simple Algorithm for Detecting Large Scale Structures”. The author has been highly responsive to my concern, and I think the paper is greatly improved and deserves the journal. However, it would be responsible to readers if the author can make clear that the GPM is a “supercluser” finder, rather than a “cluster” finder in ABSTRACT. I would not need to see the paper again and recommend it for publication.
