PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>The title of the paper is 'Characterization of Nanoinclusionins in Nanocomposite.' But the real content of the paper is a simple numerical analysis of the stress field of a short fiber in a matrix which is perturbed by nearby inclusions. The title doesn't match the content of the paper.</p> <p>It is noted that the 'nano fiber' is only 40 nm long. The authors should seriously consider if the reinforcement can be called a fiber.</p> <p>What's the dimension of the inclusions?</p>	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
