

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Physical Review & Research International
Manuscript Number:	MS: 2012/PRRI/2209
Title of the Manuscript:	New (G'/G)-expansion method and its applications to nonlinear PDE

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>In the revised version of the manuscript, the authors have done an extremely poor job especially with the citation of papers. In the entire manuscript, the authors write the citation numbers, however, the reference list is not numbered. Another serious issue is that the authors either did not write the names of the authors in the reference list or skipped a few authors names in the reference list. Here are a couple of examples:</p> <ol style="list-style-type: none">1. In the reference list, the reference number 3, there are no authors names listed.2. The 10th citation on page 8 of the manuscript, there is more than one author's name missing from this paper. <p>This simply shows that these authors are big slackers and way too lazy to do research. Why are these authors even writing a paper when they are not at all serious about research? These authors are suggested to go and do something else where they are good at. There is one last chance that will be given to these authors to fix all the mistakes by not being slacker and lazy. Then the manuscript will undergo another round of revision before a final decision be taken at the next and final stage. I warn these lazy authors that if there is any such attitude visible in the final round, this manuscript will be rejected outright.</p>
