

PART 1:

Journal Name: [Physical Review & Research International](http://www.sciencedomain.org)

Manuscript Number: 2013_PRRI_3745

Title of the Manuscript: Form of nonequilibrium statistical operator, thermodynamic flows and entropy production

General guideline for Peer Review process is available in this link:

<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>

This form has total 9 parts. Kindly note that you should use all the parts of this review form.

PART 2: Review Comments		
	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The quality of the English used in the article is rather poor. A major grammatical revision is needed.</p> <p>It is very difficult to identify the novel aspects of the work, since most of the main physical ideas included in the article seem to be already contained in Refs. [5-8].</p>	<p>Attempts have been made to improve English. Grammatical revision is performed.</p> <p>The basic physical idea is given the important role played by the finite lifetime of the system and the distribution of the lifetime. Many aspects of this work are consistent with the ideas [7]. In [5-6] showed that the exponential function in [1-3] may be replaced by an arbitrary weighting function. But did not indicate that is the distribution of the lifetime.</p>
Minor REVISION comments	<p>In line 82 Heisenberg is wrongly spelled. Also, in line 97 the authors seems to use the word "pulse" with the generalized momentum of classical mechanics.</p>	<p>This is fixed.</p>
Optional/General comments
