Subject: Re: Request for final decision for manuscript number 2013_PRR1_4006

This revised manuscript is not well replying my concerns. At least, it requires grammatical and spelling check throughout the content.

There are too many errors, for examples: see error marked in { } bellows

Section 1.2

(1) ...Rattan cane and bamboo present{s} a problem in this respect since the quality cannot be controlled as they are naturally occurring materials....

(2) ...According to Lucas and Dahunsi [8], {T}he rattan cane concrete bond strength ranges...

(3) ...The average compressive test for different bamboo family have bee{n} investigated by various researchers,...

Section 1.2.1

(1) ...Olutoge *et al*, [1], Ghavami [16], Francis and Paul [4], Mentioned in their works ha{t} the ability of...

Section 1.3

(1) ...The experiment has been carried out on {F}ifteen (15) short concrete struts. ...

Section 2.2

No equation number, bad location for citing reference, such as:

$$N = 0.4 F_{cu}bh + A_{sc} (0.8F_y - 0.4 F_{cu}) [19]$$

$$P = 0.8 Ag (0.225 F_{cu}) [4]$$

.....more errors.....

It is better to ask a native English speaker to check and edit the manuscript. It also requires checking for the entire manuscript to fit in the journal format standard.

This manuscript is acceptable after comply with the above comments. Otherwise, reject it.

It is no need to send me back the revised version again.
