

This revised manuscript is not well reply my concerns. At least, it requires grammatical and spelling check throughout the content.

There are too many errors, for examples: see error marked in { } belows

## Section 1.2

- (1) ...Rattan cane and bamboo present{s} a problem in this respect since the quality can not be controlled as they are naturally occurring materials....
- (2) ...According to Lucas and Dahunsi [8], {T}he rattan cane concrete bond strength ranges...
- (3) ...The average compressive test for different bamboo family have bee{n} investigated by various researchers,...

### Section 1.2.1

- (1) ...Olutoge *et al*, [1], Ghavami [16], Francis and Paul [4], Mentioned in their works ha{t} the ability of...

## Section 1.3

- (1) ...The experiment has been carried out on {F}ifteen (15) short concrete struts. ...

## Section 2.2

No equation number, bad location for citing reference, such as:

$$N = 0.4 F_{cu}bh + A_{sc} (0.8F_y - 0.4 F_{cu}) [19]$$

$$P = 0.8 Ag (0.225 F_{cu}) [4]$$

.....more errors.....

It is better to ask a native English speaker to check and edit the manuscript. It also requires to check for the entire manuscript to fit in the journal format standard.

This manuscript is acceptable after comply with the above comments.

## CORRECTIONS TO MANUSCRIPT

1. All the errors observed in points 1-4 were due to typographical errors and all these have been corrected in the last manuscript that was send to you about a week ago.
2. All other errors have been reviewed; the two equations in section 2.2 have been designated Equations 3 and 4. While the reference for the equations have been well placed. Please go through the last manuscript I send to you last week. Which I have re attached to this mail.
3. Note that more work have been done on this manuscript in order to make it look good but any further errors observed may be due to oversight.
