Subject: Re: FW: Request for final decision for manuscript number 2013\_PRRI\_4006

This manuscript is acceptable.

There are some minor suggestions needed to be revised:

(1) In Section 1.1, skip the <space> in paragraph:

Ratten has ....in Indonesia. <space> This finding...

(2) Use the correct format of equation number for all equations. e.g. use (1) instead of using .....1

(3) In Section 2.2, change " Where:" to "where" . Check for all.

(4) In Section 2.2, skip <space> ....Table 1. <space> The low yield steel.... hacksaw. <space> The mild steel.....

(5) In Section 3, divide the first paragraph into two or three paragraphs.

(6) The format used in Reference should be consistent as the following example:

Avazpour A. Calculation of surface elastic constants of a Gay-Berne nematic liquid crystal from new direct correlation and pair distribution functions. Liquid Crystals. 2012;39:1491-1497.

Check all references to comply with format standard. Note that there is no "year" in reference 16.
