Subject: Re: Request for final decision for manuscript number 2013_PRRI_6711

This article can be published since the author has made the corrections suggested by the reviewers.

It would have been better if the author had responded in more detail the comments of the reviewer SR. But it is not such a crucial requirement when keeping in mind that as Reference No. 1 is cited a detailed survey of Dr. Kalbitzer where the necessary information is available.

Therefore, my conclusion is that the work can be published in this form.
