**SDI Review Form 1.6**

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b><u>Compulsory</u></b> REVISION comments	Seems to be interesting work. However, short hand writing does not help. Some of the number and equations are not clear( $10^6(12)$ etc.) Since this being theoretical work how easy is it to make these structures? Authors should clarify. What will be the costs involved? Is it feasible practically?	
<b><u>Minor</u></b> REVISION comments	Improve (a) introduction (b) results and discussion part (c) provide more references	
<b><u>Optional/General</u></b> comments	MINOR REVISIONS required.
