

SDI Review Form 1.6

Journal Name:	Physical Review & Research International
Manuscript Number:	2013_PRRI_6718
Title of the Manuscript:	Focusing of Optical Vector-vortex Beams
Type of the Article	Research Paper

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	This manuscript focuses on the focusing properties of optical VV beams which play an important role in many domains. There are two points authors should describe in detail. One is why LG beams are chosen as incident beams in this manuscript, or if other kinds of beams are used, whether the conclusions remain. The other is author may add axial intensity curve corresponding to figure 6, in order to show focal depth extend more clearly	
<u>Minor</u> REVISION comments	Some words in figures may be more clearly, for instances in figure 2(b), 4(d), and 6(d).	
<u>Optional/General</u> comments
