

**SDI Review Form 1.6**

Journal Name:	<a href="#">Physical Science International Journal</a>
Manuscript Number:	2014_PSIJ_10647
Title of the Manuscript:	Basic Laws of EM Theory
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

**SDI Review Form 1.6**

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b><u>Compulsory</u></b> REVISION comments		
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments	The author of this article instead of electricity, as the basic substance of EM theory, sets static potential, as some energetic fluid as the starting quantity. All the remaining EM quantities are defined in succession, by the standard differential equations, with algebraic relations and central laws derived from them, as their formal consequences. Not only that majority of the former results are thus confirmed, but some of them are finally completed.	This is just the abstract of my paper.
