

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	2014_PSIJ_10668
Title of the Manuscript:	A REVIEW OF THE CONSTRUCTION OF PARTICULAR MEASURES
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>The paper is a review for measure theory. The author(s) illustrates the construction for some measures which are important in other fields of mathematics. The paper is well organized; the English expression of the authors is well. I think that it deserves to be published in in Physical Science International Journal.</p> <p>However, there are some problems in this paper which need to be revised.</p> <p>1, Some references have not cited in the paper.</p> <p>2, The author(s) should clarify the motivation of the work.</p>	<p>Thank you.</p> <p>1. Comments well noted and addressed.</p> <p>2. This is a review paper and the idea is to provide a compact, bordering on oversimplified idea of measures with some examples on the construction of some measures. We generally have not come across any book that treats/shows the construction of ALL of the measures treated in this paper and we believe it is a good idea and convenient to have a single paper with those illustrations and which is easily accessible to any interested party.</p>
<u>Minor</u> REVISION comments	<p>1, Citations are not sufficient for the depth and breadth of the paper.</p>	<p>More citations have been added to deepen the depth and breadth of paper.</p>
<u>Optional/General</u> comments
