

**SDI Review Form 1.6**

Journal Name:	<a href="#">Physical Science International Journal</a>
Manuscript Number:	2014_PSIJ_12654
Title of the Manuscript:	Non-wave solutions of the Maxwell-Einstein Equations
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

**SDI Review Form 1.6**

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b><u>Compulsory</u></b> REVISION comments		
<b><u>Minor</u></b> REVISION comments	<p>In general, the manuscript is typical of what we can see in the field of physical mathematics.</p> <p>Some remarks:  line 149: instead of (3.7) we obtain the equation  line 249: Consider the relation (3.4)  These expressions are absent in the manuscript; the author uses the other kind of numbering of expressions (1), (2), ...  Regarding speculations about gravitational waves: since these waves have never been detected, I think no sense to discuss them in the paper. The author can talk about a potential possibility hidden in the space structure, as unmanifested.  The English should be improved.</p>	<p>All mistakes are eliminated  I tried to do my best to improve English  What about gravitational waves, I must say that it is really a question under discussion. There are indirect evidence related to the observation of double stars.  I discuss this question only in relation to my solution and briefly mention the different points of view on the question</p>
<b><u>Optional/General</u></b> comments	<p>The manuscript might be published after the author's revision taking into account the remarks above.</p>
