

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	2014_PSIJ_14033
Title of the Manuscript:	THE INCREASING ROLE OF CHEMISTRY IN UNDERSTANDING TRIBOELECTRIC CHARGING OF INSULATING MATERIALS
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The article is well structured and clearly written. Cited literature is relevant.	
<u>Minor</u> REVISION comments	Even when the authors presented the problem very clearly, the discussion of the involved forces and/or types of bonds is missing. It would be interesting to include if, according to the situation, the involved forces are columbic, or include dipoles, etc.	The forces are simple mechanical (stress) forces which result in (strain) distortion of the materials. Coulomb forces are not involved in any part of this review.
<u>Optional/General</u> comments
